

## **Super Spars Launched the new double tapered Fireball spinnaker pole ready for the new 2014 sailing season**

### **Details:**

- Design complies with the International Fireball Class rules.
- Construction of S-glass and epoxy which provides the least bendy pole than anything else on the market.

- Provides an exceptionally light pole, which makes handling much easier.
- Double taper which creates a much smaller diameter at the ends of the pole, which makes holding the pole much easier for the crew to use.
- Considerably stronger, lighter and stiffer than all other products in the market.
- Rigorous testing over the 2012 and 2013 season

- Ramp glued onto pole to create a very smooth pole launch and recovery Composite triggers fitted as standard
- Composite spinnaker pole ends
